

AIRPLANE USE OF GREAT VALUE AS AN AUXILIARY TO INFANTRY

(Correspondence Associated Press)

BEHIND BRITISH LINES IN FRANCE, June 15.—The uses of the airplane as an auxiliary to infantry in action are being continually extended. It is the opinion of military leaders here that the need for more and more machines and trained men is shown by the success of the low-flying airplanes in operating against the Germans during the past two months.

On the western front, this spring two factors—German recklessness of life and the success of the allies in holding back the German airmen—gave the opportunity of developing on a large scale this method of harassing attack.

The success of the low-flying airplanes is of two kinds—the slaughter they inflict, and secondly, the disorganization they cause. This second factor is of more importance than most people realize. An unexpected check to troops on march is always troublesome. Men wonder what has happened. Suddenly bombs begin to fall, men are killed and horses stampede, wagons are smashed and the road blocked. Until the allied airplanes are seen, the terror is mysterious. When they are seen, with the irresistible implication that the German planes have failed to drive them off, the psychological effect is very severe.

The work of the British airmen re-

ceived a reluctant tribute in a recent issue of the Berlin Vorwärts, which was captured in a raid on the German trenches. The German newspaper, in an article full of apparently sincere admiration for British flyers, said: "Never before have the English thrown their airmen in such great masses behind our front as they are doing in their present retreat."

"Superiority is another matter, and it is true that at the moment this may be claimed by the allies. For example, the British record of bombs dropped in April show twelve to one against the Germans. The present superiority can be maintained, not only on general grounds, but particularly for the development of the new tactics of the low-flying airman."

"What is needed is more machines and more trained men, and it is the people, the men and women of the allied countries, who in the last analysis must give or withhold effective superiority in the air."

tation proportionate to their number and importance in the war economic organs, so that questions affecting their whole existence shall not be decided conclusively under the influence of the going concerns.

Government officials said the reply of the German government would be one of the most interesting economic phases of the war, as indicating what plans are in the making for safeguarding industry at large for many important concerns.

The association hopes to obtain for the idle corporations a representa-

BEN D. LUCE
of Nye County

Candidate for nomination on the Democratic ticket for Governor
Subject to the decision of voters at the Primary Election Tuesday, September 3, 1918

Chas. F. Wittenberg
Announces his candidacy on the DEMOCRATIC TICKET

For
County Commissioner
For the Long Term
Subject to ratification at the primary election.

WALTER C. LAMB

OF WASHOE COUNTY

CANDIDATE FOR NOMINATION ON THE REPUBLICAN TICKET

FOR

United States Senate

SUBJECT TO THE DECISION OF VOTERS AT THE PRIMARY ELECTION TUESDAY, SEPTEMBER 3, 1918

To the Voters of Nevada:

I take this means of announcing my candidacy for the office of

United States Senator from Nevada

subject to the action of the Democratic primary

Charles B. Henderson

YELLOW PINE MINE OPENING BIG ORE

OREBODY ON 700-FOOT LEVEL IS PROVED ENORMOUS IN SIZE

Conditions at the Yellow Pine are better today than ever before, says the Goodsprings (Nev.) Gazette. Recent developments have uncovered much new ore and the big orebodies appear almost inexhaustible.

Perhaps the most interesting work has been taking place on the 700 level, where the mammoth orebody was opened two years ago. It is difficult for anyone who has not visited the mine to comprehend the size of the enormous stopes, which is a "glory hole," indeed. Four hundred feet long by forty feet wide by 180 feet high—those are the dimensions at the present time. Just try to imagine a hole in the ground of that size, from which countless tons of ore have been removed—and still the work goes on. Sides, roof and floor are solid ore of the beautiful character common to the Yellow Pine mine. At the south end of the stopes a slight break occurred which was at first thought to cut off the ore. But this has recently been penetrated, and more ore of even richer quality was encountered.

The end of the orebody is not yet in sight. At the north end of the stopes a winze is being sunk which will eventually connect with the 900 level. The floor of the stope, which is in solid ore, will be mined through this winze.

On the 900-foot level the electric air drill is making splendid progress. For some time little pockets of ore have been found, and there has been much zinc mixed in with the shale, and present indications point to the finding of an orebody of some size.

Operation is also being maintained on the second, third and sixth levels

with satisfactory results.

Only about 1 per cent of the area of Ireland contains marketable timber.

NOTICE

To all registrants in classes 1, 2, 3, or 4 under original jurisdiction, and all registrants in the above named classes, not under original jurisdiction, but under the territorial jurisdiction of the Local Board for the County of Nye, are hereby ordered to appear at once at the office of said Board and present such evidence as they may care to submit, by affidavit or otherwise, bearing upon their engagement or non-engagement in a productive occupation or employment.

W. H. THOMAS, Chairman.
L. E. GLASS, Clerk.
LT. DR. J. R. MASTERTON,
Examiner.

TO THE PUBLIC:
The Selective Service Regulations make it the duty of all persons connected with the administration of the Selective Service Law and Regulations, AND OF ALL CITIZENS, to report to the nearest Local Board all facts that may come to their knowledge concerning Registrants who are idle or engaged in any non-productive occupation or employment.

W. H. THOMAS, Chairman.
